Office Action Summary

Application No.

09/783,598

Applicant(s)

MORIIZUMI, KIYOKAZU

Examiner

Tuan T Dinh

Art Unit

2841

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 September 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) 7-16 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Beilin et al. (U.S. Patent 6,733,685).

As to claim 1, Beilin et al. discloses a front-and-back electrically conductive substrate as shown in figures 1-9 comprising:

a plurality of posts (18) extending through the substrate and being composed of a material that can be anisotropically etched, and each having an electrically conductive portion (14) that has at least first and second surfaces that communicate with each

other (figures 7-9 show pads 14 connected on the top and bottom surfaces of the posts 18 for making electrical connection); and an insulative substrate (20) that supports the plurality of posts (5), the insulative substrate (20) being disposed between the first and second surfaces of the substrate.

As to claim 2, Beilin discloses the electrically conductive portion (pad 14) comprises an electrically conductive film (see figures 6-9) covering a peripheral surface of the posts (18).

As to claim 3, Beilin discloses the insulative substrate (1) is composed of an organic resin (column 4, lines 27-35); and the electrically conductive portion (14) is a metal having a melting temperature higher than a melting temperature of an insulation used in the insulative substrate (20) because, the metal having a melting temperature higher than a melting temperature of the resin material of the insulative substrate.

As to claim 5, Beilin as shown in figure 9 discloses a wiring pattern layer (the wiring is near the pad 14 formed on the top surface) and an insulation layer (another insulative layer 20 on top of the layer 20, see figure 9) is formed on at least the first surface (top surface) of the substrate.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beilin et al. ('685) in view of Onishi et al. (U.S. Patent 5,459,368).

As to claim 4, Beilin discloses the substrate further comprising a pad (14). However, Beilin does not specific disclose pad (14) for mounting a semiconductor component is formed on at least the first surface of the substrate.

Onishi et al. teaches an electronic device (1) as shown in figure 1 mounted on a pad of a substrate.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a pad for mounting a device, as taught by Onishi et al. employ in the substrate of Beilin for the purpose of providing an excellent electrical connective bonding.

As to claim 6, Beilin does not disclose the insulation material of the insulative substrate having compensation of CTE different from the CTE of a mounted semiconductor component. However, Onishi et al. show a surface acoustic wave device mounted module in figure 1 comprising a surface acoustic wave element (1) made of at least one material selected from a group consisting of lithium niobate, lithium tannalate, lithium borate, and quartz, and an insulating resin multiplayer substrate (8), see column 4, lines 36-47. There is a compensation of different material between the multiplayer substrate and the element that would have different CTE therebetween.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the compensation of a different material having different CTE in the substrate of Beilin, as taught by Onishi et al., for the purpose of providing the sufficient melting temperature that applied on a component when mounted on a substrate.

Response to Arguments

5. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

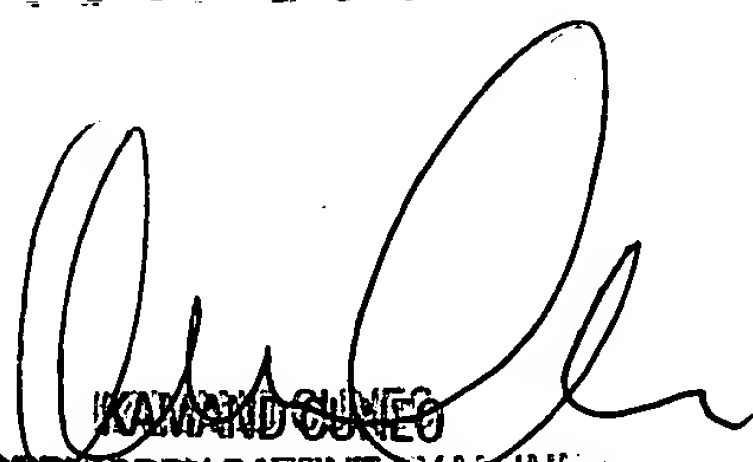

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T Dinh whose telephone number is 571-272-1929. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
